

INTEGRATED DATA COLLECTION

BARCODE DATA CAPTURE

- ✓ Configurable to your Workflows & Business Processes
- ✓ Barcode Generation, Scanning, & Validation
- ✓ Multi-Language, User-Friendly Interface
- ✓ Compatible with iOS, Android & Windows Devices
- ✓ Connects to Multiple Systems, Databases & Machines

Real-Time, Accurate Data

Real-time transaction processing that offers so much more than just the scanning of barcodes. Whether implemented within our Inventory Control solution or integrated to your ERP/business system, Radley's configurable, user-friendly interface for AIDC will change the way you think about mobile data collection. Ensure the accuracy of your business system by eliminating manual, handwritten labels and bypass time-consuming paperwork by scanning the critical data required for you to make important business decisions.

Radley's technology preserves your configured business logic and validates scanned data against the database, updating your ERP with each transaction, as it happens, in real-time. Collect data from barcodes, tags and RFID portals by connecting multiple systems, databases, equipment and machines. With compatibility on iOS, Android and Windows platforms, use Radley solutions to track data at your desk or on the go. Stay ahead of the pack by using real-time time data to anticipate issues before they arise, increase productivity and eliminate errors.

RADLEY
CORPORATION

Configurable Without Customization

Radley's Data Collection solution streamlines processes to increase efficiency and decrease errors from manual data entry, with the flexibility to conform to your warehouse or manufacturing operations, without costly customizations. Configure dashboards, fields and labels to your unique workflows and industry terminology.

Convenient transaction prompts define where and in what order the data is populated in the system, integrated to your ERP or used as a stand-alone solution. Ideal for a diverse workforce, our multi-language interface, assigned by individual user login, is easily adaptable to your employees' needs. Radley Data Collection also supports multiple locations, managed through a single interface.

Implement alone or combine with other Radley solutions:

- Inventory Control
- Shop Floor Control
- Labor Tracking
- Product Traceability
- Asset & Container Tracking
- Task Management

Robust Reporting

Radley Data Collection puts real-time information at your fingertips. Use the included basic report functionality, or work with your own Crystal reports or SQL database. You can easily view audit trails—track transactions to order numbers, personnel activity, parts/materials, and more—and export your data to Excel or to your ERP or business system to keep KPIs available for key personnel.

Reduce paperwork and put critical information in the hands of your material handlers.

Hardware & Accessories

With over 40 years of experience and implementations worldwide, our consultants have the expertise to evaluate, recommend, install, configure and support your hardware needs whatever your industry and environment. Radley is an exclusive Honeywell reseller providing mobile computers & scanners, printers and label media to customers all over the world and within numerous industries. We sell a variety of Honeywell Intermec products and accessories and have a team of experts who can assist you in selecting the hardware that will best meet your specific needs and requirements.
