

SUPPLIER COLLABORATION

- ✓ Meet Industry & Customer Requirements
- ✓ Improve Supplier Communication
- ✓ Automate Reporting & Notifications
- ✓ Eliminate Unreliable, Manual Efforts

Supply Chain Communication

You've implemented a business system and EDI (Electronic Data Interchange) to help automate and streamline the communication of critical data such as purchase orders, shipment notices and invoices between you and your customers, but the suppliers you purchase from are still calling and faxing over documents for you to manually process. How do you maintain a level of efficiency needed to meet those industry, government and customer standards when you have a mix of suppliers with and without the technology required to do business within your supply chain?

Supplier Collaboration via the Web

Smaller, less sophisticated suppliers can lack the physical and financial resources to implement a full EDI solution. Radley's iSC Supplier Collaboration solution gives you the ability to manage transactions with your suppliers via an easy to use internet-based Web Portal that even your smallest suppliers can utilize. You can control and configure the portal to your business specifications, with secure access for each supplier. Easily eliminate manual efforts and decrease errors to reduce costs, free up your labor and increase visibility to your supply chain.

RADLEY
CORPORATION

How It Works

As a purchaser you license the iSC Supplier Collaboration software to streamline communications with your suppliers at multiple locations, with and without EDI. Integrate iSC to your existing business system or utilize as a stand-alone solution to increase visibility and ensure compliance.

Give suppliers access to a web-portal account, set up specific to how you do business. Configurable and with a secure company and user login, suppliers only have access to the information you want them to see.

Virtually eliminate email, fax, and telephone ordering with your suppliers.

With iSC You're In Control

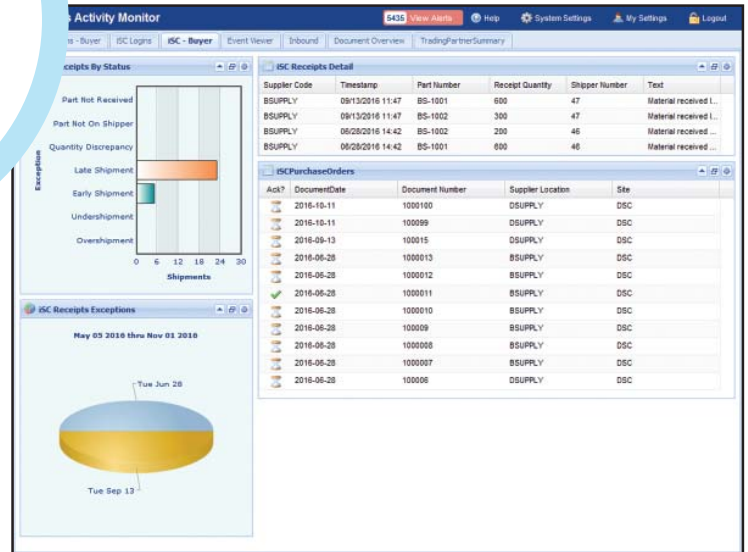

- Assign multiple order types to a supplier
- Define transactions and how they will be exchanged
- Receive real-time notifications
- Query to find pending supplier shipments
- Import/Export or integrate iSC to your ERP
- Enforce label requirements
- Configure to each unique supplier
- Give suppliers visibility to your inventory

Easily Manage Demand

iSC gives you the tools to facilitate information sharing and eliminate delays created by miscommunication of production schedules and orders. With iSC your suppliers can eliminate the manual processes involved in data entry, generating paper documents and locating data for reports. With real-time access via the web, suppliers will receive instant notifications of new orders and then take the necessary actions to view and download demand schedules.

Robust Reporting

Quickly generate reports through the embedded, customizable dashboard; monitor open orders, track supplier shipments, view exceptions and more. Integrate for enhanced reporting from your ERP or business system. Access complete historical records and documents to audit supplier performance and view the status of rolling schedules to coordinate payments for goods received.

Features & Benefits

- ✓ Secure Company/User Login
- ✓ Affordable & Easy-to-Use Web-Based Solution
- ✓ AIAG and MMOG/LE Compliant
- ✓ Automated email alerts for critical events
- ✓ Configurable to Multiple Schedule Types
- ✓ Integrate using standard API's
