## Increasing Supply Chain Productivity and Performance

*Radley Corporation announces solution platform integration with data capture products to be showcased at MODEX conference and exhibition*

**Grand Rapids, Michigan — March 15, 2016** —Radley Corporation, a global manufacturing and supply chain solutions provider and Platinum Intermec reseller announced their participation in the upcoming [MODEX](#) conference and exhibition taking place in Atlanta, GA. April 4-7 with plans to showcase their solution platform which integrates with [Honeywell](#) products; to educate attendees on how implementing a combination of software and hardware into manufacturers' production, warehouse and distribution facilities can improve productivity while reducing costs.

Radley's platform has grown over the past 40 years to encompass [EDI, MES & WMS](#) solutions that integrate to numerous business systems including large ERP's across multiple industries such as Food & Beverage, Manufacturing, Steel Fabrication, Automotive, Life Science and Pharmaceutical. They've acquired a reputation as being a "total solution provider," working with customers to review their specific needs and requirements in order to find the right combination of software and [hardware](#) that will effectively automate and streamline their processes.

"We get customers from all over the world, companies large and small who purchase equipment with the intentions of streamlining their processes; but quickly realize they are missing a crucial component: the *software* to collect, store and manage their data," said Amanda Smith, Market Development Manager, Radley Corporation. She continued, "scanning devices and printers are simply one factor of the equation when organizations are seeking to improve overall supply chain

performance. What we do best is assist our customers in evaluating their processes; configure, train and implement the solution(s) that allow them to achieve the largest return on their investment.”

An exclusive Honeywell reseller; Radley solutions run on, work with and print from a variety of Honeywell/Intermec products. Its software which captures data throughout the manufacturing process whether utilizing traditional bar codes, machine integration or the use of RFID technology allows their customers to have access to real-time data across the supply chain. Incorporating [scanning and mobility](#) technology expands and enhances Radley software, providing customers with increased benefits.
