Radley Corporation Launches Advanced Web-Based Solution for Automotive Manufacturers

Southfield, Michigan — March 21, 2017 —Radley Corporation, a leader in software for the automotive supply chain, announced the launch of its web-based supplier collaboration solution **iSC**.

Developed in response to customer and industry demand for a more efficient method of communicating with suppliers, iSC allows **automotive manufacturers** to take control of their supply chain, ensuring accurate and effective communication while managing demand and maintaining compliance. Manufacturers can direct their suppliers, with a mix of capabilities, communication methods and business systems, to utilize the easy-to-use web portal for executing electronic business transactions such as order acknowledgements, advanced ship notices (ASNs) and invoicing.

A pioneer in **EDI technology** for the automotive industry and with decades of experience, Radley understands the many challenges manufacturers and suppliers are under with the extreme pressure to design, produce and deliver safe and technologically advanced parts and vehicles. Its staff of automotive experts are continually working to expand its product offering to provide the most comprehensive solution platform. “Radley is a long time member of the Automotive Industry Action Group (AIAG) and employees have served on various committees such as **MMOG/LE** one for the past 9 years”, stated Radley President, Mark Farneth, “it’s our job to be at the forefront of this ever changing industry.”

iSC joins an already sophisticated collection of software aimed at increasing visibility, reducing costs and optimizing the supply chain. Radley customers often implement a combination of solutions configured for their unique business workflow such as, material **Traceability**, electronic data interchange, **shipment scanning** and label automation. Well known for their integration abilities, Radley’s EDI, Manufacturing and Warehouse solutions work seamlessly with multiple **ERP** and business systems.
