## Radley Solution Platform for Steel Industry

*Radley Corporation announces software for FabSuite users*

**Grand Rapids, Michigan — March 6<sup>th</sup>, 2017** —Radley Corporation, a global solutions provider, announced plans to diversify their productivity and automation platform by developing a standard integration to [FabSuite's](#) steel fabrication management software.

With the ever increasing pressure for [metal manufacturers](#) to find new efficiencies and ways to cut costs, Radley determined they could address these concerns by broadening their product offering. Fabricators, erectors and steel product manufacturers using various material requirement planning systems have been benefitting from Radley solutions through successful implementations over the last ten years. Radley felt extending the same value and advantages to FabSuite users was simply the next step. “We know the complex challenges those within the structural steel industry are facing”, stated Radley Vice President, Kevin Cammet, “implementing productivity software like Radley has proven to help our clients dramatically maximize their MRP investment.”

From a simple and user-friendly interface Radley software turns tedious daily operations and error-prone, manual data entry into [optimized workflows](#), boosting productivity and reducing labor costs. By communicating scanned data against FabSuite, Radley software validates and updates the MRP database in real-time, streamlining operations from receiving through assembly and shipping. Additional platform functionality such as [Job Site Tracking](#), Task Management and Labor Tracking can further help companies increase efficiency, retain customers and win more bids for new business.

With a few FabSuite projects already in progress, the Radley team is headed out this spring to spread the news at [NASCC](#) The Steel Conference taking place in San Antonio, Texas March 22-24. Be sure to stop by booth #8205 to learn more about Radley's solution platform for the steel industry or visit [www.RADLEY.com](http://www.RADLEY.com) today.

### **About Radley Corporation**

A full-service software vendor with a team of in-house experts who possess extensive knowledge of the structural steel industry, [Radley](#) has provided solutions for over 40 years to organizations around the world looking to improve their business logistics processes.
